**1992/03/28**

SUPPLEMENT  
REGARDING CHANGES IN SEISMIC EQUIPMENT AND  
ADDITIONAL MATTERS  
TO THE  
AGREEMENT-IN-PRINCIPLE BETWEEN THE  
STATE SEISMOLOGICAL BUREAU  
OF THE PEOPLES REPUBLIC OF CHINA AND THE UNITED STATES  
GEOLOGICAL SURVEY FOR UPGRADES TO THE  
CHINA DIGITAL SEISMOGRAPH NETWORK

Both sides, the State Seismological Bureau (SSB) of the People's Republic of China and the United States Geological Survey (USGS), will continue to honor the responsibilities stipulated in the Agreement-in-Principle between the SSB and the USGS for Upgrades to the China Digital Seismograph Network (CDSN), with the following supplement as the addition to the Agreement-in-Principle with the consent of both sides.

1. Both sides agree that the equipment specified in the Agreement-in-Principle to be provided at stations of the CDSN should be replaced by the equipment specified on the list attached to this supplement. The equipment on this list will be provided at each of the 10 stations of the CDSN.
2. Both sides recognize the complex problem of satellite telemetry of CDSN data and both sides agree to work toward a mutually satisfactory solution of this problem.
3. The USGS agrees to provide the SSB, on a more timely basis, data from the worldwide network of digital seismic stations. This data will be provided on magnetic tape within approximately three months of original recording.
4. The USGS agrees to assist the SSB in the development and training of specialists in the application of digital seismic data in research and operations.

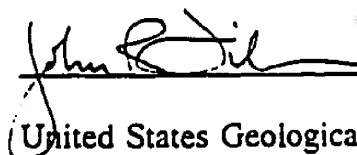

Signed:

 Gu Ping, PRC Side

State Seismological Bureau.

Date: Mar. 28 1992

EQUIPMENT AND SOFTWARE TO BE SUPPLIED AT THE CHSN STATIONS & DAC  
as part of the  
SUPPLEMENT REGARDING CHANNELS IN SEISMIC EQUIPMENT AND ADDITIONAL MATTERS  
to the  
AGREEMENT-IN-PRINCIPLE  
between the  
STATE SEISMOLOGICAL BUREAU (SSB) OF THE PEOPLE'S REPUBLIC OF CHINA  
and the  
UNITED STATES GEOLOGICAL SURVEY (USGS),  
under Annex I of the Earthquake Studies Protocol, for  
UPGRADES TO THE CHINA DIGITAL SEISMOGRAPH NETWORK (CDSN)

This list of equipment and software is for 11 stations (10 operational stations  
plus one spare). THE ACTUAL EQUIPMENT & SOFTWARE SUPPLIED WILL DEPEND ON  
COST, AVAILABILITY, AND EXPORTABILITY.
